This is what we stand for

We keep you moving – globally, digitally, sustainably, and with a human touch.

Our goal is to become the world's leading integrated logistics partner.

To this end, and since its establishment in 1872, DB Schenker has been actively working to shape the future of **global logistics** – and the way our world connects.

DB Schenker uses its sustainable and digitalized services to develop the best possible solution for every logistics requirement – with **integrity, in cooperation with our customers, and with a consistently high level of quality**. Indeed, our standard of success is the complete satisfaction of our customers.

People obviously play a key role here, and our holistic compliance management system ensures the greatest possible degree of conformance with ethical and legal standards.

We understand the responsibility we have as a pioneer in the sustainable organization of transport operations and we are firmly committed to the principles of a diverse and fair society.

We advance businesses and lives by shaping the way our world connects.

Global

We don't just transport our customers' goods; we get them where they need to go in every conceivable way.

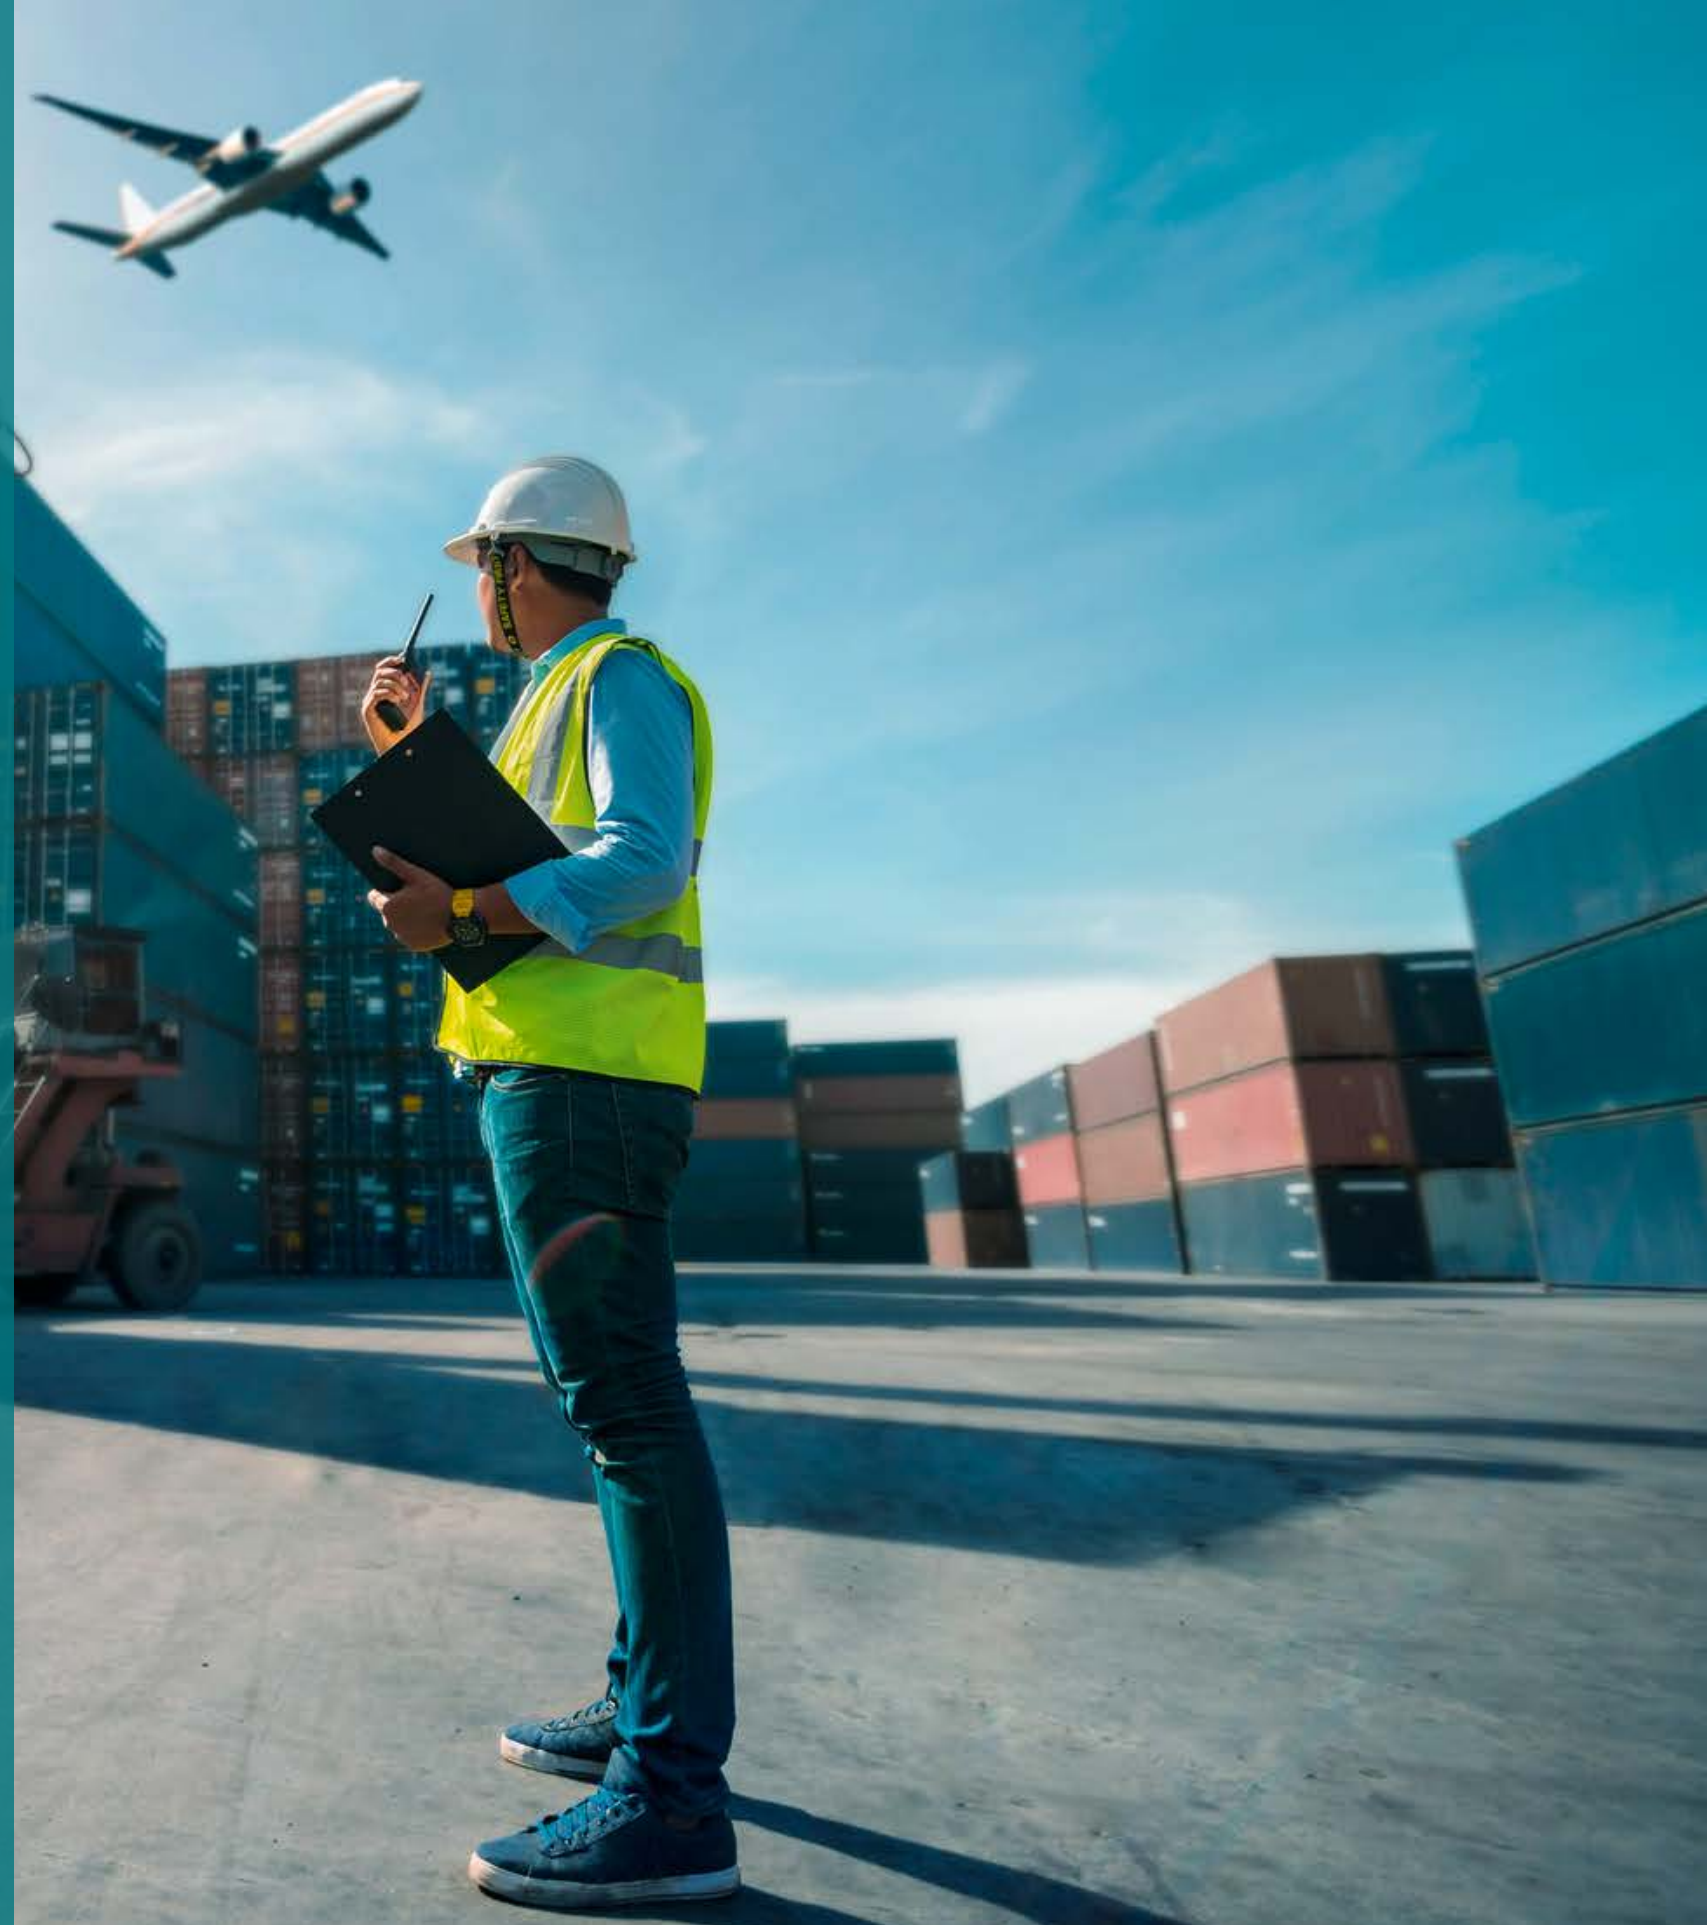

DB Schenker offers international shipping and logistics services with all modes of transport.

Our customers benefit from **comprehensive, customer-focused integrated solutions** in all partial networks and along the entire value chain – with **approximately 2,100 offices and facilities** around the world.

The company operates its own network in more than 130 countries, which means consignments always remain in the hands of DB Schenker and are subject to our strict **quality management** requirements throughout the entire delivery chain.

Our 75,000 logistics experts around the world know all the rules and regulations in the countries we serve, and these specialists are also familiar with the requirements for every type of transport.

**We establish new connections –
for progress and prosperity around the globe.**

Sustainable

We are driving the transformation to emission-free logistics.

DB Schenker is a pioneer when it comes to sustainable transport, and the company also seeks to become the world's leading provider of green logistics solutions.

To this end, we have set ourselves the goal of making all of our business operations **carbon-neutral by the year 2040.**

Our measures here focus on reducing our greenhouse gas emissions by **40 percent** from 2006 levels and ensuring **emission-free transport operations** in European cities by 2030.

DB Schenker already has **numerous sustainable services and products**, including the largest electric truck fleet in Europe. The company has also begun operating the **first commercial carbon-neutral cargo flight** and uses cargo bikes for logistics services in cities.

DB Schenker is a leading provider of transport and logistics services, which is why sustainability is one of the cornerstones of our corporate strategy.

For this reason, we intelligently link transport modes in an economical and environmentally friendly manner – in order to ensure a sustainable future.

Digital

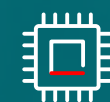

Our customers benefit from a data-driven corporate culture.

Our IT systems and the associated processes have been standardized for all of our global activities, and this design consistency ensures smooth operations in each stage of the transport chain, even in the case of customized solutions.

We make available digital services that allow logistics processes to be controlled, managed, and optimized from anywhere in realtime. Our customers can book shipments directly at our website and benefit here from **scheduling, tracking, and advanced tracking services**, as well as an **emission calculator** for carbon footprint calculations.

Mobile applications and IoT solutions also form part of our efforts to achieve the **complete digitalization of logistics processes**.

In addition, DB Schenker is using pilot projects, strategic partnerships, cooperation with startups, and R&D activities to drive digital innovation and the establishment of a data-driven logistics industry.

People

Our most important resource.

DB Schenker's employees are the foundation of our success.

Only by working as a team are we able to reliably transport consignments around the globe. As an innovative and leading global logistics services provider, we want to be the first choice for employees, customers, and recipients.

Our **integrated compliance management system** and **certified occupational health and safety management system** are testaments to our reliability and our commitment to our employees' well being.

We also continuously pursue new approaches for supporting our employees with their daily work processes as effectively as possible.

Our solutions

On land, on the sea, and in the air.

We reliably manage your consignments – regardless how big your company is or what type of business it's involved in.

Our **global network** of DB Schenker offices and facilities enables us to adapt quickly and **flexibly** at any time to changed circumstances and new customer requirements, even as the network itself remains resilient.

From startups to regional family-run companies and international corporations – DB Schenker develops the **right cost-optimized solution for every logistical challenge.**

Our solutions optimize supply chains and ensure the smooth execution of all types of logistics processes.

We establish new connections – to make the world a better place day by day.

Product segments

Land transport

Our range of high-quality land transport solutions ensures that your consignments arrive at their destinations on time – regardless of whether they're shipped by truck or train.

Land transport

Air freight

Our extensive network of top-class airlines ensures short delivery times at favorable terms, as well as end-to-end shipment tracking – for maximum flexibility and efficiency.

Air freight

Ocean freight

Uninterrupted and reliable ocean freight transport establishes a bridge to your sales and procurement markets. We ensure smooth ocean transports by managing everything from loading/unloading to picking and packing and quality control.

Ocean freight

Contract logistics/SCM

From the pick-up at the supplier to delivery to the customer (with value-added services included) – our contract logistics solutions cover all phases of the supply chain. We have the right cost-optimized solution for every business model.

Contract logistics/SCM

Trade fairs/specialized transports

Trade fair transports and special logistics – the services of DB Schenker here allow you to focus exclusively on your trade fair presentation. Our experienced and highly qualified staff members will take care of everything else in line with your specific requirements.

Trade fairs

Specialized transports

6 reasons

to choose DB Schenker.

We put together the right package for you

Whenever we receive an inquiry, we design a cost-optimized logistics solution in line with the customer's specific requirements, whereby it makes no difference here how big the company is or how extensive the order might be.

We help you achieve your sustainability goals

We continuously develop new environmentally friendly logistics solutions in order to support our customers with their efforts to achieve their sustainability goals and targets, and we constantly analyze the economic and environmental aspects of our transports.

We offer you the highest quality standards

Numerous certifications for IT, quality management, environmental management, and occupational health and safety demonstrate our extensive commitment to excellence.

We serve you with a global logistics network of DB Schenker offices and facilities

Our 75,000 logistics experts around the world know exactly what needs to be done to ensure smooth and reliable transports. DB Schenker delivers your consignments reliably to their destinations – always on time, regardless of local circumstances.

We make a uniform service platform available to you

Among other things, our digital portals offer comprehensive tracking and scheduling services that ensure the best possible monitoring and management of transport chains.

We maintain stringent compliance standards

Our integrated compliance management system ensures that all ethical principles are adhered to and all legal requirements are met – with regard to employees, customers, and consignment recipients.

DB Schenker

Our history.

DB Schenker has shaped the logistics industry throughout the company's history. Here are the most important highlights:

- 1872** – Gottfried Schenker establishes Schenker & Co. in Vienna, Austria
- 1873** – First consolidated cargo shipment by rail from Paris to Vienna
- 1922** – First air freight transport in Germany
- 1931** – First ocean freight container transport
- 1947** – Establishment of a subsidiary in the U.S. – further development of international business and air freight operations
- 1991** – Stinnes AG acquires a majority interest in Schenker from the Deutsche Bundesbahn railway company
- 2019** – Use of the first all-electric truck for daily transport operations
- 2020** – First carbon-neutral commercial cargo flight in history
- 2021** – First public flight by the VoloDrone cargo drone – in cooperation with DB Schenker
- 2022** – Use of exoskeletons in normal warehouse and freight handling operations
